

# COVID-19 FRONT LINE COUNTER SHIELD

Protecting your front line staff is **priority number 1.**

# **As a concerned manufacturer, EXM wants to participate in the public health effort against COVID-19.**

We have set up the production of a polycarbonate counter shield which aims to reduce the exposure to COVID-19 and other contaminants.

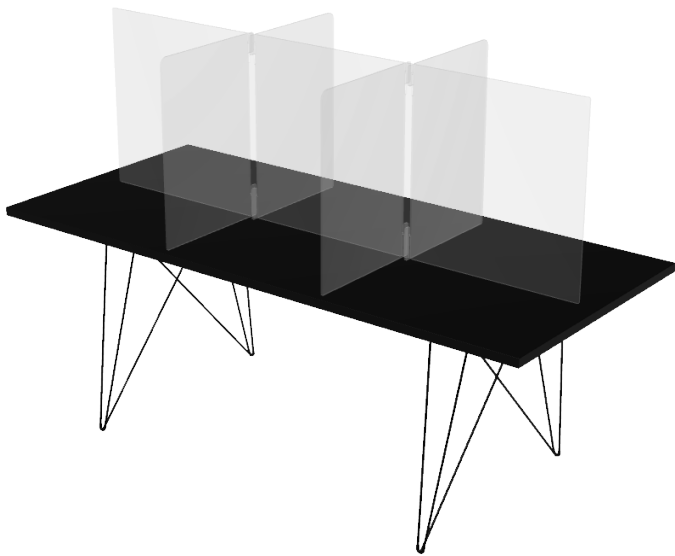

This protective screen forms a physical barrier between your front line employees and your customers.

## **Why do we choose polycarbonate?**

- Polycarbonate is one of the strongest and most flexible materials on the market.
- It can be exposed to high temperatures.
- Polycarbonate is resistant to chemicals. It is therefore less likely to be damaged during maintenance.
- It can be drilled without cracking.
- It's less prone to chipping.

## **The counter shield is ideal for many situations:**

- Retail stores/wholesale stores
- Restaurants, Coffee Shops
- Public and private offices
- Grocery stores and supermarkets
- Hospitals
- Schools
- Public transport drivers
- Practically anywhere!

## A counter shield that really protects you!

We use polycarbonate sheets to achieve a much more robust and durable shield comparatively to acrylic counter shields.

Depending on the thickness, polycarbonate is about 250 times stronger than glass. While equivalent acrylic is only 10-20 times stronger than glass.

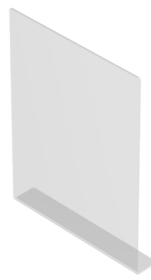

## Standard counter shields

We offer 7 different standard models and a wide range of dimensions to meet all your needs.

**Flat shield**

HEIGHT	WIDTH
24	18
32	24
32	32
32	48

**EXM is not responsible for the installation. If you are not comfortable installing a counter shield yourself, please contact your local contractor.**

Please note that EXM do not accept returns. Before ordering, make sure your counter shield is suitable for your application.

For more information on hygienic shields, please consult the product page available in the accessories section of the website ([exmweb.com](http://exmweb.com)).

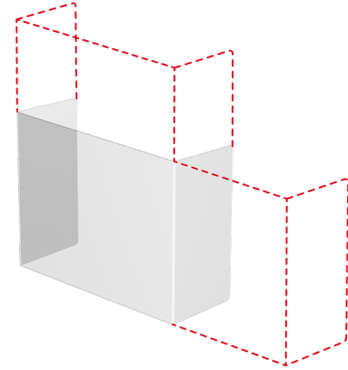

# Custom counter shields

3 easy steps to personalize your shield and obtain a perfect fit.

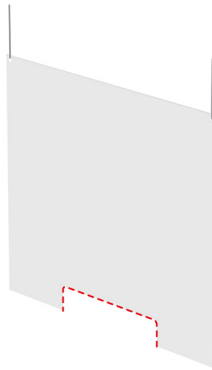

## Step 1

Go to [boxcadexm.com](http://boxcadexm.com) and select the best shield for your application.

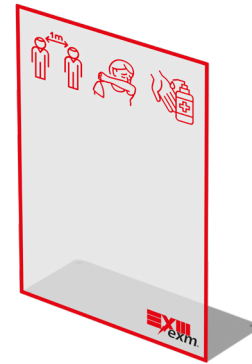

## Step 2

Select an available dimension or enter custom dimensions.

## Step 3

Add cut-outs to facilitate interactions between your staff and your customers.

**You wish to display your logo, safety instructions or more?**

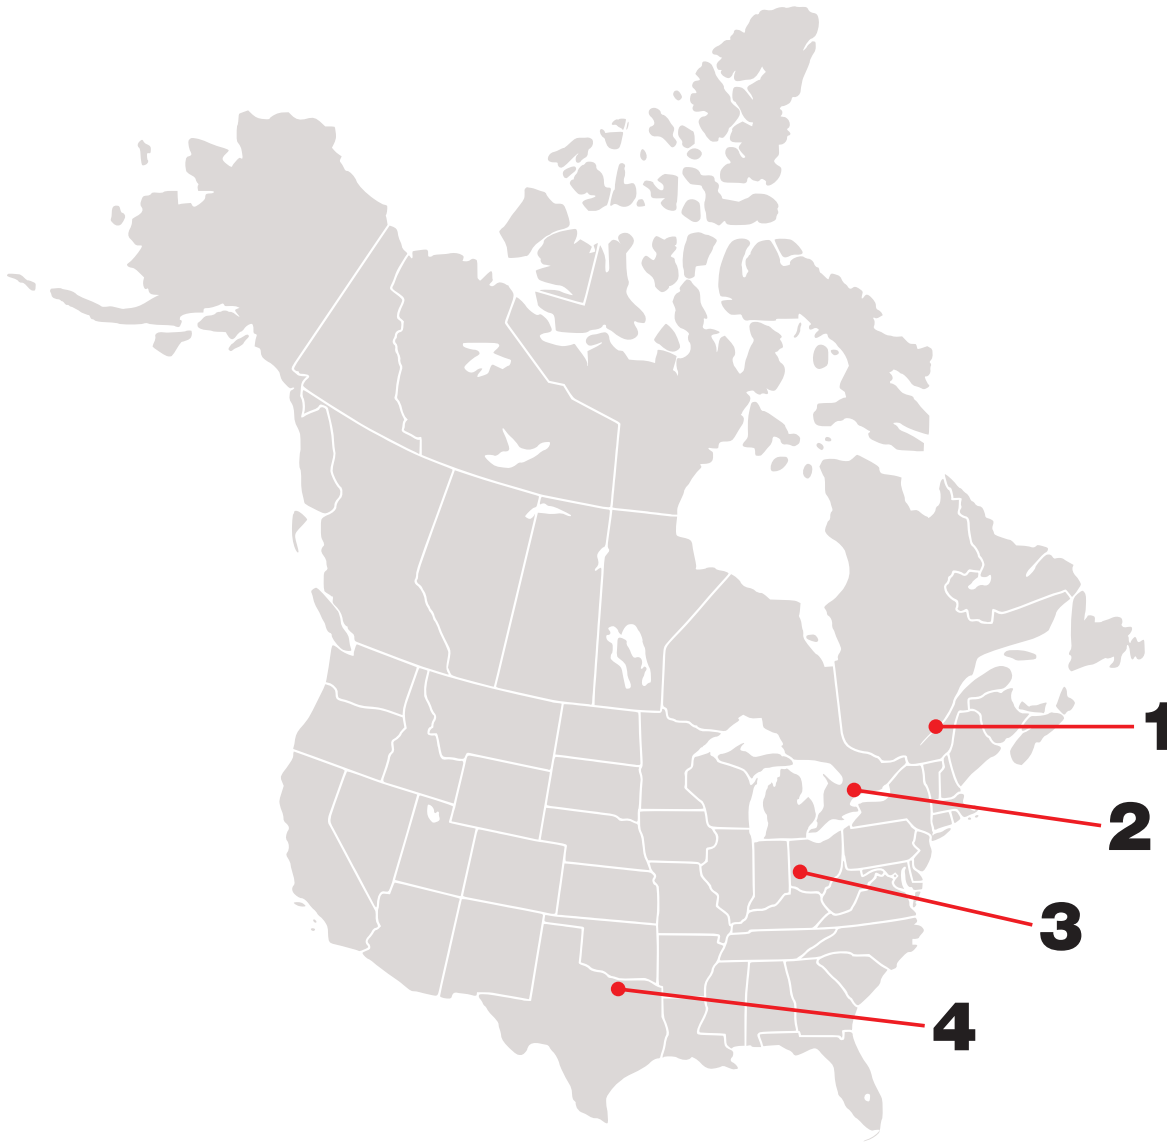

We offer UV printing on your shield. Please contact us for more details.

**Customize now: [boxcadexm.com](http://boxcadexm.com)**
